NEW PASTA: LOW GI, HIGH IN PROTEIN, GREAT FLAVOUR

Pastificio Mennilli's KAMUT Pasta is made with an ancient wheat called Khorasan, which is organically grown and higher in protein than durum wheat. Contains gluten but is often able to be tolerated by people who have trouble digesting regular wheat products. The KAMUT® trademark symbol guarantees this product is made from the organic Khorasan Wheat variety, which is a pure strain of wheat that has never been genetically modified. Low GI pasta with a nutty flavour and firm texture.

Available in Fusilli and Spaghetti.

INGREDIENT UNCOVERED: FARRO FLOUR

Farro is a type of grain used in traditional Italian cooking. It is naturally high in fiber and contains more B complex vitamins than regular wheat.

Instead of wheat flour, try substituting farro flour in your favourite bread, pasta, cake and muffin recipes. By using farro flour you'll be adding a deliciously nutty flavour to your recipes as well as added health benefits.

2008 Regio Maremma Rossa IGT - Sangiovese Ciliegiolo blend. Ciliegiolo is a variety named after the Italian word for 'cherry'. A good balance of fruit and subtle tannin with cherry and mulberry flavours.
